Github,Jira

MySQL

📁 PROJECTS

Quiz Application

Quiz Application in Java Spring Boot

Developed a quiz application using Java Spring Boot framework.

Implemented features such as user authentication, quiz creation, and scoring.

Created a user-friendly interface for participants to take quizzes and view their results.

Kit Voice Meeting Application

Developed an application named Kit_Voice for conducting online meetings.

Utilized Java Spring Boot framework to handle backend functionality.

Asmita

The Ecommerce Platform for Self Help Groups is a web-based system that enables selfhelp groups to sell their

products online. The system is built to provide a platform for these groups to showcase and sell their handmade

products, such as clothing, accessories, home decor, and more.

Anganwadi Survey App [🔗](#)

The Anganwadi Survey is a mobile application that enables Anganwadi teachers to collect and store information

about their students. The project is designed to help Anganwadi teachers easily record and track information

about their students, such as their personal details, health information, and academic progress.
